

Etic Informatique

DEVELOP YOUR INFORMATION SYSTEM WITH ETIC-INFORMATIQUE

Your activity is out of the ordinary and you want to make sure that the information your customers, your employees, your partners and your suppliers need is available at the right time and at the right place. The skills of the analysts and engineers of Etic Informatique help you develop the specific tools you need to meet your requirements.

- An efficient team of analysts helping you to describe and formalize your needs.
- A development and partners network to ensure implementation of the final solution.
- A technical and business team to guarantee the sustainability of the chosen solution.

AN ETHICAL PHILOSOPHY

Ethics, etymologically the Science of Morals and Customs, is not an empty word for our collaborators. Since 2002, Etic has adopted an ethical work philosophy.

- All our customers are NGOs, International Organisations, Foundations or Social and Medical organizations.
- The client is provided with a detailed description and a precise quote for the work to be performed at a very early stage.
- The client always personally knows the project manager and each collaborator working on the project.

Service skills for a cause

A UNIQUE KNOW-HOW

Capitalizing on the unique experience gained within these organizations, our analysts are well versed in comprehending and responding to the diverse needs of our clients, even when this involves complex environments.

Our technicians and engineers have a high level of experience and competence. We constantly invest in their training so that they are kept abreast of new technological evolutions and methods.

- Microsoft Technologies .net (Windows et Web): C#, Visual Basic.Net, ASP.Net
